Dear Sir or Madam

Planning consultation: Construction of a temporary wellsite for the appraisal of gas, including drilling operation, proppant squeeze and flow testing operation and site restoration
Location: Land East of the Mill Yard, Burniston Mill, Coastal Road, Burniston, Scarborough, YO13 0DB.

Further to our letter of the 17th March 2025, please treat this letter as additional advice in view of the location of the application site within the setting of the North York Moors National Park and within the boundary of the North Yorkshire and Cleveland Heritage Coast.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

NO OBJECTION

A lack of objection does not mean that there are no significant environmental impacts. Natural England advises that all environmental impacts and opportunities are fully considered and relevant local bodies are consulted.

Natural England's further advice on designated sites/landscapes and advice on other natural environment issues is set out below.

Landscape advice

The proposed development is for a site close to a nationally designated landscape namely (North York Moors) National Park.

Natural England has concluded that impacts on the nationally designated landscape and the delivery of its statutory purposes to conserve and enhance the area's natural beauty wildlife and cultural heritage of the park; and to promote opportunities for the understanding and enjoyment of the special qualities of the park by the public, can be determined locally by the local planning authority, with advice from its landscape or planning officers.

Natural England is not confirming that there would not be a significant adverse effect on landscape or visual resources or on the statutory purposes of the area, only that there are no

landscape issues which, based on the information received, necessitate Natural England's involvement.

We advise that the planning authority uses national and local policies, together with local landscape expertise and information to determine the proposal. The policy and statutory framework to guide your decision and the role of local advice are explained below. Your decision should be guided by paragraph 182 and 183 of the National Planning Policy Framework, which requires great weight to be given to conserving and enhancing landscape and scenic beauty within National Landscapes, National Parks, and the Broads and states that the scale and extent of development within all these areas should be limited. Paragraph 183 requires exceptional circumstances to be demonstrated to justify major development within a designated landscape and sets out criteria which should be applied in considering this proposal.

Alongside national policy you should also apply landscape policies set out in your development plan, or appropriate saved policies.

The relevant local authority landscape or planning officers should be able to advise you based on knowledge of the site and its wider landscape setting, together with the aims and objectives of the area's statutory management plan. Where available, a local Landscape Character Assessment can also be a helpful guide to the landscape's sensitivity to this type of development and its capacity to accommodate the proposed development.

The statutory purposes of the National Park are to conserve and enhance the natural beauty wildlife and cultural heritage of the park; and to promote opportunities for the understanding and enjoyment of the special qualities of the park by the public. The Broads have additional purposes to promote their enjoyment by the public and protect the interests of navigation. You should assess the application carefully as to whether the proposed development would have a significant impact on or harm those statutory purposes.

Furthermore, [Section 245](#) (Protected Landscapes) of the Levelling Up and Regeneration Act 2023 places a duty on relevant authorities (which includes local authorities) in exercising or performing any functions in relation to, or so as to affect, land in a National Park, the Broads or an Area of Outstanding Natural Beauty in England, to seek to further the statutory purposes of the area. This duty also applies to proposals outside the designated area but impacting on its statutory purposes.

The National Park's planning or landscape officers may be able to offer advice in relation to the duty, including on how the proposed development aligns with and contributes to delivering the aims and objectives of the area's statutory management plan.

Landscape advice (Heritage Coast)

The proposed development is for a site within a defined landscape namely North Yorkshire and Cleveland Heritage Coast. Natural England advises that the planning authority uses national and local policies, together with local landscape expertise and information to determine the proposal. The policy and statutory framework to guide your decision and the role of local advice are explained below.

Your decision should be guided by paragraph 191 of the National Planning Policy Framework. It states:

191. Within areas defined as Heritage Coast (and that do not already fall within one of the designated areas mentioned in paragraph 189), planning policies and decisions should be consistent with the special character of the area and the importance of its conservation. Major development within a Heritage Coast is unlikely to be appropriate unless it is compatible with its special character.

The NPPF continues to state in a footnote (footnote 67) that *“For the purposes of paragraph 190 and 191, whether a proposal is ‘major development’ is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined.”*

Alongside national policy you should also apply landscape policies set out in your development plan, or appropriate saved policies.

Where available, a local Landscape Character Assessment can also be a helpful guide to the landscape’s sensitivity to this type of development and its capacity to accommodate the proposed development.

Should the proposal change, please consult us again.

Yours faithfully

Lindsay Robinson
