Subject: New comments for application NY/2025/0030/ENV

Categories:

New comments have been received for application NY/2025/0030/ENV from Miss Nicola Elson.

Comments:

Where to even begin. I can't believe this is even being considered at all. How ridiculous. I am absolutely done with the 1% making money at the expense of everyone else. The impact of this ridiculous plan will be so massive and negative for Scarborough, it's environment and people and it is so obviously a terrible idea I have to question how we have got to this point at all.

Having experienced seismic tremors when they built the new stadium in Manchester, for Manchester City FC you can't tell me that it won't be so much worse here when they are talking about 20 years of messing with our geology. Apart from the impacts from traffic and the pollution to our water. Once those chemicals are in our ground water how exactly do you plan on getting them out? I can tell you who won't care and won't be funding it, Europa Gas. The cost will end up falling on the already impoverished people of this area. Why should we have to tolerate this awful awful thing so a few people can make more money?
