Good Evening,

I live in High Hawsker , Post Code YO22 4LU and visit Scarborough regularly to shop, visit theatre, take grandchildren to beach etc. I also visit the plant nursery at Burniston.

I object to the proposed Fracking at Burniston near Scarborough and my reasons for doing so are indicated below.

1. Environmental damage. Burning more gas increases speed of climate change. We need more power but from renewable sources.
2. Major disruption to local traffic for an extensive period of time in a very popular tourist area will be caused by the lorries travelling to and from the site.
3. Fumes from gas flaring, dangers to domestic water supplies, possibilities of earth tremors or worse, noise and light pollution affecting local residents and an unnecessary negative affect on tourism and the tourist economy.

Yours Faithfully  
Derrick Harmer.
