Subject: New comments for application NY/2025/0030/ENV

Categories:

New comments have been received for application NY/2025/0030/ENV from Mr Phil Spruce.

Comments:

I wish to record my strongest objection to the above application for the following reasons, ..

- 1] Damage to the holiday industry,
- 2] Eyesore of a 38ft high drilling rig , and associated equipment, situated on the heritage coast.
- 3] Additional heavy goods traffic on already busy roads. Many children walk to school hence greater risk of road traffic accidents.
- 4] The adjacent cliffs are vulnerable and are already eroding. This process could be disastrous in accelerating the cliff erosion.
- 5] There is a major fault line nearby.
- 6] Danger to wildlife and destruction to their habitat.
- 7] The proposed workings are under many homes, businesses and schools etc. This process may cause pollution and earth tremors as well as risk to water supplies etc.
- 8] Although there may be differing views about the causes for Climate Change. One of the main reasons given by governments around the world is that the use of fossil fuels must be abandoned in favour of green energy. For this reason, I have to question why this application is even being considered.
- 9] I have attended several residents meeting regarding this application and it is clear that this project is definitely not wanted. As our representatives it is imperative that North Yorkshire Council put the people of Burniston and surrounding areas first before the interests of big business.

In conclusion, this application should be rejected along with any further applications that may be submitted.

Thank You.
