I OBJECT on the following grounds:

- . If this application gets the go ahead the delicate eco system will suffer and it will pollute the water table.
- . The drilling will be right next to the village and will be unsightly in an area of natural beauty.
- . House prices will suffer.
- . The increase in traffic and the proposed route - the roads are not geared up to take it.
- . There would be no benefit to the local economy. No extra jobs would be created locally.

Signed
