Re Europa Plan to Frack nr Scarborough

I most strongly oppose and object to the Europa fracking application in North Yorkshire close to the village of Burniston, an area of outstanding natural beauty. This is an act of vandalism by Europa, destroying the natural environment. Once this natural balance is destroyed it can never be recovered.

I want my grandson to inherit a better earth and not one that has been plundered with reasons that I don't feel can be justified.

The in-house skills of Europa could surely be better used to develop clean and renewable energy for all of our futures and for the generations to come.

Regards
