Europa Oil and Gas application for appraisal drilling at Burniston Mill Site

We are writing to object to the above Planning Application made by Europa Oil and Gas for the construction, drilling and testing of this site to extract gas through a proppant squeeze process.

We object for the following reasons:

We are in the middle of a climate crisis and the government is committed to reducing our reliance on fossil fuels for the sake of the planet and the lives of our grandchildren. So for a company to consider drilling for gas to sell to other countries is counter to everything we should be doing.

This is a beautiful part of the countryside, near to the National Park and the Heritage Coast. The proposal is for a 100 foot drilling rig, noise, pollution, gas flares, country roads clogged up with HGVs, constant light affecting the wildlife, all these will have a catastrophic impact on this area.
