For the attention of Amy Taylor Case Officer

I wish to OBJECT to the application by Europa Oil and Gas ref: NY/2025/0030/ENV.

The reasons that I wish to object are numerous. Firstly due to the huge environmental impact it will have to the local area and because it will contribute to irreversible climate change.

I work as an NHS doctor as a GP in an Emergency Department and it is clear this project will affect people's physical and mental health significantly. It is close to a school and many villages that will be adversely affected with respiratory issues and there will be a huge increase in depression and anxiety. This, having been highlighted by many people, will mean the council, if they let this go ahead will be liable for thousands of cases against them for this impact.

The marine life and coastal birds and wildlife will be adversely affected when they are already in decline and should be doing everything we can to protect them.

It will have a huge impact also on the huge amount of tourism (which I am to the area) that the coastal path attracts and affect many local businesses who will need huge amounts of compensation.

It is unthinkable such an application could be given the go ahead.

Please consider this strong objection.

Yours sincerely
