**Categories:** ■

New comments have been received for application NY/2025/0030/ENV from Mrs Jane Probert.

Comments:

I am writing in connection with the above Planning Application made by Europa Oil and Gas for the construction, drilling and testing of this site to extract gas through a proppant squeeze process. I am a regular visitor to this area and strongly object to the planning application. I am a regular visitor to the area and I wish to object for the following reasons:

Noise Pollution - Deafening sounds through drilling.  
Chemical Pollution - possible pollution to water supply.  
Pollution - gas flaring - toxic fumes and smells.

Climate change - burning gas - would mean more CO2 and methane. When we should be moving towards renewable and clean energy.

Road safety - there will be large HGV's using local, narrow roads on already busy roads.

There will be a significant impact on tourism in the local area - which will be affected by devastation to wildlife, nearby national park and visitors to the area.

This is such a beautiful and peaceful area, with wildlife and a stunning coastline. This should not be allowed to go ahead! when there are other energy options.
