Subject: New comments for application NY/2025/0030/ENV

Categories: ■

New comments have been received for application NY/2025/0030/ENV from Mr Lee Perkins .

Comments:

This application is against our government's net zero policy. This application is not welcome within the area proposed, This application is not a good idea as the company are only chasing money, this company has been in trouble before financially and does not care about the environment, wildlife or what impact they will cause to the area and neighbourhood.

There are other options they could looking at like offshore for example.
