Dear Ms Taylor

I understand you are still accepting responses to the planning application to drill for gas in Burniston. I am sending my comments as a resident of North Yorkshire. My address is: 65 Farndale Street, York YO10 4BR.

I object to the drilling going forward on the basis of the following:

- noise and light pollution and risk to water supply
- proximity to homes and site of special scientific interest
- CO2 and methane emissions
- risk of earth tremors

I would be grateful if my objection could be logged as part of the planning application consultation.

Regards
Christopher Copland
