---

New comments have been received for application NY/2025/0030/ENV from Mrs Anna Giddings.

Comments:

The map showing the location of shale gas is below my house. I do not support mining of any kind below my house regardless of depth. The potential for earthquakes is high and I am concerned about what damage this could do to my property or neighbouring properties. I also am concerned about how much water would be taken from the local area. The three becks are only small, with the climate becoming more dry, the water should be conserved and used for farming/ecosystems. The carbon footprint will be huge when we should be reducing reliance on non renewables.
