Re planing application by Europa Oil and Gas at Burniston.

I wish to object to any sort of drilling, fracking or other means to extract non renewable resources. We should not be going down this route to provide more energy. I believe it is extremely bad for the environment in many ways.

Our family have a static caravan on the coast road which means that this project may also be disruptive to our enjoyment of this facility, which gives me a second reason to object.

Yours

Hoping that sense will prevail

Julie Stanger
