Subject: New comments for application NY/2025/0030/ENV
Date: 02 December 2025 10:22:59

New comments have been received for application NY/2025/0030/ENV from Mr Robin Allan.

Comments:

To pursue this source of energy is having a negative and damaging effect on the global economy causing destructive environmental effects.

Investing in more environmentally friendly sources of energy is so much more beneficial for local and global communities.

Please reject this application, we have had enough of the Fast Buck Freddies and give more consideration for the children who have to live in the environment we continually making more toxic.
