Subject: Planning Ref. No: NY/2025/0030/ENV - Europa Oil and Gas application for appraisal drilling at Burniston Mill Site
Date: 12 January 2026 18:10:38

Hi there,

I am writing to let you know that I object to the Europa Oil and Gas application for appraisal drilling at Burniston Mill Site in the strongest possible terms. There is absolutely no doubt that our climate is changing for the worse, and any activities that lead to a warming planet are not only detrimental to our current health but also our future survival as a species. Fracking - and any activities leading to fracking - counts as one of these activities. I believe we should leave fossil fuels where they are and refocus the efforts of NYC on promoting green, renewable fuels and a healthy planet. This strategy would also be in line with the upcoming permanent ban on fracking expected in Spring 2026.

Further, I would also strongly encourage any future meetings regarding this planning application to be located in Scarborough so local residents and everyone locally affected by these proposed changes can attend. Anything else would come across as serious bias and mismanagement.

My name and address are below - but please redact these from the public space and don't share them publicly:
