NY/2025/0030/ENV - Europa Oil and Gas application for appraisal drilling at Burniston Mill Site

I'm writing about this application to make three points:

1. Please defer the decision

There are several reasons to do this:

a Cllr Crane of NYC has asked the government for guidance on policy. It is essential that NYC waits for their response before making a decision.

b The government has committed to permanently ban all fracking which should be confirmed in the Energy Independence Bill in Spring 2026.

c The draft NPPF is currently under consultation until March 10th. This contains significant implications for the proposed Fracking operations. The current application relies heavily on the current policy.

2. Meeting locally

I'm asking that the planning meeting regarding this application is held in Scarborough as this will enable those most affected to attend.

3. Visiting the site

I'm asking that all the councillors who will be involved in the voting process visit the Burniston site before making their decision. It is vital that the local context is understood.

Kindest regards
