Subject: RE: Consultation by the County Planning AuthorityNY/2022/0042/A27

Hi Amy

Thanks for consulting me on this discharge of conditions. I can confirm that I am satisfied with the ecological information submitted in support of these conditions. An Ecological Mitigation, Monitoring and Management Plan has been agreed and this should be adhered to as part of any works on site including in relation to the watercourse diversion and crossing. The ecological consultants have confirmed the current status of protected species within the area.

I have no further comments to make on this submission.

Best wishes

Julia
